To the Board Members and Directors of the Marsh Ridge Homeowners Association

There are certain owners, who do not want children crossing their yards on the way to or from school or anywhere else. as this is private property.

The steep hill on the east side of Bonita Circle of Marsh Ridge belongs to the city of Delano. It is governed by the Delano Power Plant. This property has been under construction of the water drainage from the new Intermediate School.

In late summer and fall new grass seed and new trees were planted on the hillside. The new grass should not be trampled on or walked on by anyone, especially the children from school. This also includes the hillside near the Intermediate School building. This area has slopes, that if the grass doesn't grow, there could be mud slides, which did happen this Fall.

The city has provided sidewalks from the schools, that are maintained, and to be used by the students.

We are asking the board to publish this in the Marsh Ridge Bulletin to make other owners aware of the problem.
